

**Product Name :**  
Automatic Rice Bugles Fried Snack Food Machine

**Product Code :**  
EQMH-CHINA-MY3010002

**Description :**

Automatic Rice Bugles Fried Snack Food Machine

**Technical Specification :**

This Double-screw fried wheat flour snack processing line uses double screw extruding technique to replace the traditional steam boiling process with high efficiency and no pollution without a boiler. The raw material can be total whear flour, or mixing with corn powder, rice powder, or others. By changing the moulds, the products can be in different shapes. After fried and flavored, the final snacks will be crispy and tasty. This line has features of continuous working, stable performance, and reasonable design.

| Power Consumption(kw) | Output(kg/h) |
|-----------------------|--------------|
| 30                    | 150~200      |
| 50                    | 250~350      |
