

Product Name :
Fried Bugles Chips Snacks Extruder Making Machine

Product Code :
EQMH-CHINA-MY3010004

Description :

Fried Bugles Chips Snacks Extruder Making Machine

Technical Specification :

This Double-screw fried wheat flour snack processing line uses double screw extruding technique to replace the traditional steam boiling process with high efficiency and no pollution without a boiler. The raw material can be total wheat flour, or mixing with corn powder, rice powder, or others. By changing the moulds, the products can be in different shapes. After fried and flavored, the final snacks will be crispy and tasty. This line has features of continuous working, stable performance, and reasonable design.

Installed Power(kw)	Output(kg/h)
45	150~200
80	250~350
