BUGLES PRODUCTION LINE MACHINE

Bugles Chips Snacks Food Flavors Machines

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3010001	**Bugles Production Line Machine**	**China, exported worldwide**

Description

Bugles chips snacks food flavors machines for applying seasoning to fried bugles and similar shaped snacks, covering oil spray and powder dosing so the flavour is carried onto the surface evenly.

Seasoning is where a snack either tastes like the sample or does not. Powder will not stick to a dry snack, so oil is sprayed first at a controlled rate and the powder is dosed in proportion to the product flow rather than at a fixed rate. Under-dosing gives bland product; over-dosing wastes expensive seasoning and leaves loose powder in the bag. Contact us with your flavour list and line speed and we will specify the oil spray and dosing arrangement.

Technical specification

Formula: Free to buyers.
Advantage: Professional engineer team,steady quality,customization service.
Energy Source: Electricity,Diesel Oil, Gas.
After-sales Service Provided: Free spare parts, Field

Equipment list in the snack food production line:
This Double-screw fried wheat flour snack processing line uses double screw extruding technique to replace the traditional steam booling process with high efficiency and no pollution without a boiler.
The raw material can be total whear flour, or mixing with corn powder, rice powder, or others.
By changing the moulds, the products can be in different shapes.

After fried and flavored, the final snacks will be crispy and tasty.
This line has features of continuous working, stable performance, and reasonable design.

Installed Power(kw)	Power Consumption(kw)	Output(kg/h)
45	30	150~200
80	50	250~350
