

Product Name :
Flavoring Line

Product Code :
EQMH-CHINA-MY3013003

Description :

Flavoring Line

Technical Specification :

Flavoring material adopts screw fixed conveying, advanced flavoring system guarantee flavored evenly, speed of screw are adjustable.

Rotary roller adopts complete molding without dead angle.

Mainly used to process the potato chips, and other snacks,etc.

The falvoring lines contains many types of machines, such as single and double roller flavoring machine, eight square flavoring machine .

These are professional equipments for flavoring of different food materials with additives and seasonings.

Besides,the flavoring machines are automatic and easy to control.

It is widely used in many areas.

Double or single roller spraying machine features :

The inverter controls seasoning powder spreading speed;

Visual technical parameters for easy control;

Stainless material, safety and sanitation;

With holes at the spraying part in the screw, seasonings can be sprayed more evenly;

Adjustable spray-head adjusts seasonings' fineness;

Shrink design at the outlet can extend flavoring time.

Eight square seasoning machine features:

Stainless material, safety and sanitation;

No dead angles at the roller, fully stirring seasonings?
Steady running speed and lower noise;
Convenient cleaning;
Automatic discharge at the outlet, easy operation.

Product capacity	150kg/h	250-1000kg/h	80-100kg/h
Installed power	0.75kw	1.5kw	0.55kw
Power consumption	0.5kw	1.2kw	0.5kw
Mainmotor power	0.75kw	0.75kw	0.55kw
