

Product Name :
Continuous Fryer

Product Code :
EQMH-CHINA-MY3013005

Description :

Continuous Fryer

Technical Specification :

Compact structure ,easy operation

Has advantage of continuous production, save the labor

Food-grade stainless steel ,frying time and temperature can be controlled automatically according to the quality of snacks food

The food fryer is an equipment used for frying food.

Made of stainless, the machine contains belt conveying system, automatic lifting system, circulating heating system, oil groove heat preserving system etc.

Owing to the safety ,sanitation , easy operation and high efficiency of food fryer, it is widely used in frying many kinds of food such as puffed snacks, nuts, bean products ,flour products, meat etc.

Automatic digital oil temperature controlling system;

Advanced mechanical transmission and variable frequency speed control system;

Electrical lifing system, convenient to clean and maintain;

Automatic filtration system extend the frying time, no need to change oil frequently?

High efficient heating system avoids the waste of electricity, save enegy?

Double net belts prevent food from floating and make sure fried evenness.

Production capacity	300kg/h	300kg/h
Installed power	36kw	36kw
Power consumption	30kw	25kw
