

Product Name :
Automatic Meatball Production Line

Product Code :
EQMH-CHINA-MY3014004

Description :

Automatic Meatball Production Line

Technical Specification :

The Main Processing Procedure of Meatball Production Line

The procedure of making fish meatball

Raw fish ?Fish Scaling ?Fish skinning ?Remove fish bones ?Meat grinding/chopping?Mix with seasonings? Form meatballs ?Boiling ?Cooling ?Packaging

Frozen fish meat ?Slicing ?Meat grinding/chopping ?Mix with seasonings ?Form meatball ?Boiling ?Cooling ?Packaging

The procedure of making beef/pork meat ball

Beef/pork meat ?Meat chopping ?Meat grinding ?mix with seasonings ?Meatball forming ?Boiling ?Cooling ?Packaging

Meatball Production Line Application

Our meatball production line is suitable for producing various meat balls, like pork balls, beef balls, fish balls, and vegetable balls and so on. Meatballs produced by our meatball production line are of perfect and consistent shapes, good taste, and uniform size. The production line keeps the product structure intact and has a high production capacity.

Advantages of Our Meatball Production Line

The whole line is made of SUS 304 stainless steel and NSF materials in line with the food healthy standards, and it is durable and healthy.

The conveyor is driven by chain.

Sectional type automatic temperature control.

Adjustable boiling speed and water speed.

High safety and easy operation.

The production line can produce various size and kind of meatballs.

Meatballs produced by our Meat Production Line are with good taste, smooth surface and high flexibility.

It is fully automatic and so improves the production efficiency and reduces the labor intensity largely.
