

Product Name :
Automatic Bone Crushing Machine

Product Code :
EQMH-CHINA-MY3014013

Description :

Automatic Bone Crushing Machine

Technical Specification :

Bone Crushing Machine Introduction

Our hot sale bone crushing machine is best known for its durability and reliable performance for crushing various kinds of animal bones.

Bone crushers are made from the super quality alloy steel which is processed by special heating process, ensuring a durable and heavy load design.

The output of our animal bone crusher is always the finest of bone powder each time.

Easy operation and high efficiency is always a point of focus attracting customers.

Animal Bone Crusher Application

The bone crushing machine is most suitable for crushing bone of 5-80 mm, the output particle size is of 3-5mm. This bone crushing machine is specially designed for grinding fresh/dry animal bones such as beef bone, pork bone, sheep bone, donkey bone, fish bone, chicken, etc.

The ground bone particle can be further processed by bone grinding machine which makes the particle size into bone paste.

Wide application in the following industry: Food industry: sausage, luncheon meat, meatball, compound seasonings, bone powder, bone soup, puffing snacks, food ingredients and other frozen fast food; Pet food industry and Bio-pharmacy industry

Bone Crushing Machine Design Features & Advantages

Optimal structure design of cutting blade has improved single blade shearing force and impacting resistance. The cutting blades are made of superior alloy steel, durable and wear-resistant.

The electric motor is equipped with overload protective device which can ensure safe operation.
The feeding hopper is made of stainless steel material, noise insulation.
Can be used with a conveyor to reduce labor intensity, realizing automatic in and out of the material.
Compact structure and reliable performance.
Adjustable particle size and high efficiency.

Capacity: 300-600kg/h

Power source: 11kw
