

**Product Name :**  
High Efficiency Meat Dicer Machine

**Product Code :**  
EQMH-CHINA-MY3014014

**Description :**

High Efficiency Meat Dicer Machine

**Technical Specification :**

**Brief Introduction of Meat Dicer Machine**

Amisy meat dicing machine is reference to the international advanced mechanical to design and manufacture, reasonable structure.

It can accurately cut the meat into cube, slice, wires, strip and has high work efficiency, cutting the diced minimum specifications for 4mm, the maximum size of 30mm. Meat dicer machine is the first choice for food processing and cutting equipment.

**Meat Dicer Machine Features**

Made of stainless steel, fine workmanship, beautiful appearance, durable.

Compact structure, strong universality, economical and practical.

Safety protection performance, convenient to clean and maintenance.

Adjust the cutting thickness knob, the meat push rod pushing speed changes, in order to achieve different cutting thickness requirements.

Adopt the pre-pressure control design, to ensure that diced block uniform and cutting size correct.

Adjustment meat push rod for step motion, single blade cutting can minimize the extrusion of products in cutting process.

Cutting slot one side use the active lateral pressure mechanism to facilitate feeding, improve work efficiency.

Capacity	Size of cutting slot	Power	Cu
500-600kg/h	84x84x350mm	1.5kw	5,6
700-900kg/h	120x120x550mm	2.25kw	5,6
