

Product Name :
Fried Food Deoiling Machine

Product Code :
EQMH-CHINA-MY3015002

Description :

Fried Food Deoiling Machine

Technical Specification :

Fried Food Deoiling Machine Introduction

Fried food de-oiling machines are centrifugals made of stainless steel (for most parts).

They are fully-closed and special typed machines with digital control panel, automatic electromagnetic brake, compact base, anti-shock device, frequency & speed controller and movable whirling bucket.

Fried food deoiling machine is widely used for extrude the food extra oil to ensure the fried foods tastes good and more healthy for human.

Centrifugal Deoiling Machine Highlights

Electromagnetic brake, centrifugal principle.

Anti-vibration system prevents vibrating during dewatering process.

Full automatic digital control.

High productivity and easy operation.

Fried Food Deoiling Machine Features

The fried food deoiling machine adopts the centrifugal principle, through the fast rotating barrel to extrude the extra oil.

Centrifugal deoiling machine is equipped with anti-shock system which ensures a reliable working condition.

Equipped with electromagnetic brake, the fried deoiling machine features a safe and quick on-off.

This machine is also equipped with digital control panel which make the operation of high automation and labor-saving.

Wholly made of stainless steel, sanitary and also easy to clean.

Fried food processes by the deoiling machine is more healthy and yummy.

Capacity	8-10kg/time	15-20kg/time	25-30kg/time	35-40kg/time
Power	0.75kw	1.1kw	1.5kw	2.2kw
Voltage	380v/50Hz	380v/50Hz	380v/50Hz	380v/50Hz
