

**Product Name :**  
Potato Washing and Peeling Machine

**Product Code :**  
EQMH-CHINA-MY3015004

**Description :**

Potato Washing and Peeling Machine

**Technical Specification :**

Vertical Potato Washing and Peeling Machine

Vertical Potato Washing & Peeling Machine Introduction and Application

This potato washing and peeling machine is mainly used to clean and remove the peel of potatoes, sweet potatoes, taros, lotus root, carrots, mustards, yam, turnip, and some other root vegetables & fruits, which is an indispensable washing and cleaning machine for the restaurants, hotels, and some other vegetable or food processing industries, and also it can be a necessary equipment of a potato chips production plant.

Vertical Potato Washing and Peeling Machine Working Process

Firstly, lifting device delivers the potatoes to the rinsing tank.

Then the cleaning and peeling devices begin to wash and peel the skin of the potatoes continuously.

In the end, the thruster pushes the peeled potatoes to the prepared potato container.
