

Product Name :
Raw Peanut Grading Machine

Product Code :
EQMH-CHINA-MY3016005

Description :

Raw Peanut Grading Machine

Technical Specification :

Peanut Grading Machine Introduction

As we know, the peanut has different sizes, so the raw peanut grading machine is used to grade and sort the raw peanut in shell by size and it can grade the peanut into 2-4 sizes. This is a kind of extremely advanced peanut processing equipment making the peanut separated from different discharging mouth.

Peanut Grader Machine Features

Stable working performance.

Large capacity, high efficiency and grading exactness.

Low damage rate.

With the rotary-drum sieving & sorting, the peanut in the drum is pushed forward by the screw vane, and sorted by sieve screens of different sizes.

It is proper for the large-scale peanut planting farm and the peanut processing plant.

Capacity: 1500-2000kg/h

Power source: 220V/380V/2.2Kw
