

Product Name :
Palm Nut Shelling Machine

Product Code :
EQMH-CHINA-MY3016011

Description :

Palm Nut Shelling Machine

Technical Specification :

Palm Nut Shelling Machine Introduction

Palm nut shelling machine is used in collecting places of small scale palmary and wild palm processing center, which can shell the palm nut from hard shells.

Besides, this nut shelling machine can also shell the hard oil seeds like walnut.

It has the features of easy operation and convenient maintenance, wide usage etc.

The shelled palm kernel can be further processed into value-added products like palm kernel oil, roasted palm nuts.

So here we recommend our automatic palm kernel oil machine and nut roasting machine, if you need.

Multifunctional Nuts Shelling Machine Features

This nut shelling machine can be used for shelling nuts of various size and hardness .

Palm nut shelling machine is one grade size cracking process.

It cracks nuts one time one size and the roller gaps can be adjusted for other sizes cracking.

This multifunctional nut shelling machine can shell apricot nuts, walnuts, haze nuts, and other kinds of nuts.

This machine is reasonably designed and its ratio of broken kernels is low.

It is the most ideal nut processing machine available now.

Nuts Shelling Machine Advantages

High-efficiency.

Professional and advanced skill, saving time and labor.

High shelling rate of 95% and low damage rate of 1%.

Easy to operate.

Capacity: 200-300kg/hour

Power source: 380v/1.5kw
