

VEGETABLE PROCESSING PLANT

Blanching Machine

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172005	Vegetable Processing Plant	China, exported worldwide

Description

Blanching sets colour, halts the enzyme activity that causes off-flavours in storage, and softens produce enough for the stages that follow. This blanching machine is built in stainless steel throughout for that duty, where hot water and steam are constant and corrosion resistance is not optional. The machine is specified for straightforward operation and consistent output over a long service life, with dimensionally accurate construction and simple installation. Stainless steel construction also means the unit can be cleaned down to the standard food production requires between batches. It is supplied new and packed in a wooden case for export. Tell us the produce you are blanching, your throughput per hour and whether you are working to water or steam, and the specification can be confirmed against that.

Technical specification

Material: Stainless Steel Application: fruit Packaging Details: WOODEN CASE for almond blanching machine
