

FOOD PROCESSING LINE EQUIPMENT

Vegetable and Fruit Washing Line

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172010	Food Processing Line Equipment	China, exported worldwide

Description

An automatic washing line for vegetables and fruit, combining cutting, washing, drying and conveying in one continuous run. It operates on a 380V three-phase supply drawing 3 kW, and is built throughout in stainless steel. Supplying these four stages as a line rather than as separate machines removes the manual transfers between them, which is where most product damage and most contamination risk occurs in a wet processing area. It also means the drying stage is matched to the washing stage: produce leaving a washer wetter than the dryer is rated for will carry water into packing and shorten shelf life. The line is specified for industrial duty and continuous running. Tell us your hourly throughput and the produce you are handling, and the stage sizing can be confirmed.

Technical specification

Power supply: 380 V Power consumption: 3 kW Automation grade: Of Machines Cutting, Washing, Drying, Conveing Material: Stainless Steel
