| EQMH-CHINA-MY3172032 | Meat Processing Machine | China, exported worldwide |

## Description

A vacuum filler running at up to 1,000 portions per minute with a portioning weight range from 1 gram to 99,999 grams and a filling pressure of 45 bar. It draws 6 kW, weighs 1,100 kg and measures 2,036 by 926 by 1,356 mm. Portioning accuracy comes from a modern servo drive rather than a mechanical cam, and product is moved by a large rotary vane conveyor system designed for gentle transport. That combination matters on emulsified and coarse products alike: a filler that handles product roughly breaks the structure built in the bowl cutter, and no later stage recovers it. The machine is designed to suit all filling applications, including operating clipping machines, hanging lines and attachments. A servo-twisting drive variant is available. Folding hoppers come in 100, 160, 250 and 350 litre sizes, with a lifting and tipping device for 120 and 200 litre standard lifting trucks. Operation is through a simple touch screen.

## Technical specification

Power consumption: 6kW Weight: 1100 kg Folding hopper variants: 100 L, 160 L, 250 L und 350 L Lifting/tipping device for: 120- and 200-litre standard lifting trucks Max Portioning Speed Approx: 1000/min Portioning weight: 1-99,999grams Filling Pressure: 45bar Hopper Capacity: 250tr/500lb External Dimensions: (WxDxH) -2036 x 926 x 1356 mm

## Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
