

Product Name :
Fried Ice Machine-Double Pans

Product Code :
EQMH-CHINA-MY3017006

Description :

Fried Ice Machine-Double Pans

Technical Specification :

Fried Ice Machine(Double Pans) Introduction

Double pan fried ice machine is designed to mix the ice cream with different flavored products like fruit, porridge to produce ice mud, snow ice, fruit ice and ice porridge. Double pan fried ice machine is equipped with two pans ensuring a large output.

Double Pans Fried Ice Cream Machine Features

Double pans fried ice machine consists of two round pans, one compressor and a controller, compact structure and little land occupancy.

Adopt advanced refrigeration technology with quick freezing.

Streamlined construction design, compact structure.

Adopt high-power compressors to ensure fast cooling and consistent performance.

Applicable to mix and freeze a wide range of materials like sugary liquid, fresh fruit, juice, milk, soft drink, coffee, cola, beer, porridge, into frozen ice yogurt.

Quick cream filling. When you turn the switch on, the two pans begin to work simultaneously.

Good cooling performance. Air cooling mode is adopted to improve the heat dissipation, even in high temperature condition, it can still work normally.

Advance compressor from Mitsubishi, reliable performance and low malfunction rate.

Voltage
220V/1.5Kw
220V/1.5Kw

Capacity
18Kg/h
20Kg/h

220V/1.5Kw

20Kg/h
