

NUT PROCESSING MACHINE

Food Automatic Cashew Processing Machine

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172034	Nut Processing Machine	China, exported worldwide

Description

This automatic cashew processing machine is rated at 2,200 kg per hour, putting it at plant scale rather than workshop scale. It is specified for processors running continuous shifts, where the cost of manual cutting labour per kilo of kernel has become the limit on output. The unit accepts a 220-380V supply, which covers most single and three-phase industrial connections without an additional transformer, and the frame and housings are built in mild steel and iron. At this throughput it is usually installed as a stage within a wider line, taking feed from steaming or conditioning and discharging to drying and peeling, so the surrounding equipment needs to be matched to the same rate. Send us your raw cashew nut intake, the kernel counts you sell into and your destination port, and we will confirm the configuration, a delivered price and a lead time.

Technical specification

Automation grade: Automatic Material: MS and Iron Capacity (kg/hr): 2200 kg/hour Voltage(V): 220-380V

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
