

NUT PROCESSING MACHINE

Food Cashew Nut Grading Machine

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172041	Nut Processing Machine	China, exported worldwide

Description

This cashew nut grading machine sorts nut by size at 200 to 300 kg per hour, running on a three-phase supply with a mild steel body finished in yellow. Grading is worth doing at two points in a cashew operation: on raw nut before cutting, so the cutter can be set correctly for each size, and on finished kernel before packing, so each count grade is sold at its own price. A machine at this rate is generally matched to a small or mid-size line rather than run as a shared unit across several. Complete training and installation are provided free of charge with every unit. Send us the stage you intend to grade at and the volume you handle in a shift, and we will confirm the specification and a delivered price.

Technical specification

Capacity: 200 to 300 kg per hour Motor: 5 hp Phase: 3 phase motor We provide complete training & installation service(if needed) to our customer free of cost. Material: MS Motor Power: 0.5 HP Color: Yellow Product Description: With the aid of years of understanding of this domain, we provide the handpicked quality of Cashew Nut Grading Machine.
