

Product Name :
French Fries Frying Machine

Product Code :
EQMH-CHINA-MY3015001

Description :

French Fries Frying Machine

Technical Specification :

French Fries Frying Machine Description

French fries frying machine is designed to frying various product such as potato chips, peanuts, broad beans, etc.

It can fry kinds of products at the same time, and there is no taste mixture between each other; convenient and quick, safety and health. Our French fried frying machine enjoys great popularity in medium and small food processing enterprises.

Oil-water Mixture Technology Features

French fries machine is a type of smokeless, multifunctional, water and oil mixture frying equipment which employs the most advanced frying technology.

The oil and water can automatic layered after mixing, oil frying food in the upper after heated, water receiving sinking slag below, the slag can be removed in time, not like the ordinary frying machine, while the oil black acidification due to floating black residue in a short time, so as to result in waste.

French Fries Frying Machine Advantages

The whole machine adopts imported high quality stainless steel, exquisite workmanship, durable and easy to clean

Intelligent digital display temperature controller, convenient and practical

Two type heating methods for your choice: electric heating and coal heating.

Automatic water and oil temperature control system, improve the product quality

Advanced oil-water mixture technology, reduce waste and energy-saving, the oil can save 50%, the

electricity/coal can save 40%.

Potato Chips Frying Machine Application

Kinds of products can be fried by amisy oil-water mixture frying machine.

Nuts: broad beans, peanuts, mung beans, etc

Puffed food: rice crust, french fries, etc

Flour product: orecchiette, caramel treats, Chinese doughnut and so on

Meat food: chicken drumsticks, fish flesh, etc
