

NUT PROCESSING MACHINE

Food Cashew Processing Machine

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172043	Nut Processing Machine	China, exported worldwide

Description

This automatic cashew processing machine is configured to the output you need rather than sold at a fixed rating, covering 100 to 5,000 kg of kernel per shift. The bottom of that range suits a processor taking a first step away from hand cutting; the top of it is a plant-scale installation. Because the specification is built to order, the questions that decide it are asked before manufacture rather than after: the kernel counts you sell into, the raw nut sizes you receive, the shift pattern you run and the power available at the site. Tell us the output you need per shift and where the machine is going, and we will come back with a configuration, a delivered price and a lead time.

Technical specification

Automation grade: Automatic Capacity (kg/hr): 100 to 5000 kg cashew kernel output per shift

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
