

NUT PROCESSING MACHINE

Food Semi Automatic Cashew Nut Cutting Machine

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172046	Nut Processing Machine	China, exported worldwide

Description

The semi automatic cashew nut cutting machine sits between hand cutting and a fully automatic line: the operator positions the nut and the machine performs the cut. That arrangement keeps the operator's judgement on nut orientation, which is what protects the whole-kernel ratio, while taking the physical effort out of the cut itself. It is built to industry norms using the manufacturer's selected raw materials, and is specified for consistent performance and a long service life under daily use. For processors, the case for semi-automatic cutting usually rests on nut that varies in size. Where raw nut is well graded beforehand, fully automatic cutting becomes viable; where it is not, the operator's eye still outperforms the machine.
