

FOOD PACKING MACHINE

Food Wheat Flour Packing Machine

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172065	Food Packing Machine	China, exported worldwide

Description

A wheat flour packing machine set from a keyboard, filling automatically to a quantity with weighing feedback and automatic error correction. That feedback loop is the significant part of the specification. A filler working open-loop drifts as the product density changes with moisture and batch; one that weighs the pack and corrects the next fill holds the declared weight through a run. An out-of-tolerance alarm raises anything the correction cannot absorb, so an underweight pack is caught rather than shipped. The machine also handles material control and automatic material clearing, counting, and carries electronic overload protection.

Technical specification

Build: Manufactured to the specification supplied with the enquiry or tender
