Food Roasting Oven

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172066	Packing Machine	China, exported worldwide

Description

An industrial mesh belt roasting oven built in stainless steel, with both temperature and belt speed adjustable. Temperature is controlled automatically across a 0 to 200°C range, so the oven can be set to the product rather than the product worked around the oven. Those two adjustments together are what make a single oven viable across a mixed product range. Belt speed sets dwell time and temperature sets intensity, and the combination is different for every product: the machine is used for puffed foods, pet food, textured protein, peanuts, melon seeds and jujube, each of which roasts to a different profile. The oven both roasts and dries. Its structure is compact and straightforward to operate, and the design draws on established international roasting practice alongside the manufacturer's own machine-building experience. Minimum order is one unit.

Technical specification

Material: Stainless steel Minimum Order Quantity: 1 Unit Oven Type: Industrial
