

FISH FOOD MACHINE

Fish Feed Extruder Machines

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3001018	Fish Food Machine	China, exported worldwide

Description

Fish feed extruder machines supplied in a range of sizes, from units for a single farm through to machines for commercial feed mills. All work on the same principle of cooking and expanding the mix to produce a floating pellet, with the difference being throughput and the degree of automation.

Choosing the right size matters: an oversized machine runs below its efficient range and an undersized one becomes the bottleneck in the line. We size the machine against your daily feed requirement and your intended growth over the next few years. Enquire with your current and planned tonnage and we will recommend a model.

Technical specification

Engineers at the site of installation and commissioning, training technicians.

Provide a professional selection of equipment, process, consultations on plant design.

This Fish Feed Making Machine adopts the auto-controlling speed feeding tool to produce the feed material evenly.

Electric heating device is adopted which can improve the feed expansion rate and pellets floating time.

High temperature and high pressure cooking process can kill the salmonellosis and bacterial infections and also makes the pellets easily to digest.

Installed power	Real power	Output
-----------------	------------	--------

81.5kw	53kw	100-150kg/h
115kw	76kw	200-240kg/h
181kw	117kw	400-500kg/h
135kw	100kw	1000kg/h
165kw	115kw	2000kg/h

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
