

BOMB DETECTION EQUIPMENTS

Army Desktop Explosives Detector

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172238	Bomb Detection Equipments	China, exported worldwide

Description

A desktop explosives detector analyses a swab taken from a surface, a bag or a hand and reports whether traces of explosive compounds are present. It is the fixed counterpart to a field kit: slower to deploy but far more sensitive, and it produces a result an operator does not have to interpret by eye. The substance library, throughput and interface are all specified at order, and we build against the tender schedule where one is issued.

Technical specification

Build: Manufactured to the specification supplied with the enquiry or tender
