

BOMB DETECTION EQUIPMENTS

Army Explosive Detection Kit

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172241	Bomb Detection Equipments	China, exported worldwide

Description

An explosive detection kit is a field test set: reagents applied to a swab that change colour in the presence of particular explosive groups. Its value is that it works anywhere, needs no power and gives a result in under a minute, which is why it is carried by teams who may be a long way from any instrument. Kit composition is built to what the buyer needs to screen for, and quoted against a tender's own schedule of substances.

Technical specification

Build: Manufactured to the specification supplied with the enquiry or tender
