

BOMB DETECTION EQUIPMENTS

Army Extension Mirror

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172242	Bomb Detection Equipments	China, exported worldwide

Description

An extension mirror is the simplest search tool there is and one of the most used. It lets an operator see under a vehicle, behind a panel or into a recess from a safe standing position, without putting a hand or a head into a space that has not been cleared. The variables are reach, mirror size, whether it carries a light, and how quickly it collapses for carrying. We build to the length and configuration stated in the enquiry.

Technical specification

Build: Manufactured to the specification supplied with the enquiry or tender
