NUT PROCESSING MACHINE

Peanut and Almond Kernel Slicing Machine

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3016001	**Nut Processing Machine**	**China, exported worldwide**

Description

A peanut and almond kernel slicing machine that cuts whole kernels into flat slices for bakery decoration, confectionery, chocolate work, breakfast cereal and snack mixes.

Slicing is a presentation product, which means appearance is the specification. Clean flat slices of even thickness command a price; ragged slices and a high proportion of broken pieces do not. Blade sharpness, kernel conditioning and a uniform feed size are what produce the first rather than the second, which is why slicing is normally run on graded kernel rather than straight from the sheller. Slice thickness is set to the application. Contact EMC Machines Manufactures with your slice thickness and the kernel you are running and we will advise on the setup.

Technical specification

Peanut & Almond Kernel Slicing Machine Introduction

Remarkably, peanut & almond kernels not only taste great, but are often healthy snacks. And sometimes they can be made into flakes to be the auxiliary material to add flavors to other foods. The peanut & almond kernel slicing machine is the right machine that is suitable for flaking these kernels.

Peanut & Almond Kernel Slicing Machine Features

This machine is an advanced and professional nuts slicing machine.

The peanut kernel slicing machine is suitable for other nuts as well, which needs switching cutters and the

cutter can be specially made by buyers' requirements.
The slicing thickness is adjustable (2-4mm).
The final slice is no-break and smooth.
It has large capacity and fast slicing speed.
The almond slicing machine is easy to operate and clean.

Capacity: 200-300kg/h
Power source: 380v/50Hz

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
