

BOMB DETECTION EQUIPMENTS

Army Hand Held Metal Detector

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172244	Bomb Detection Equipments	China, exported worldwide

Description

A handheld metal detector is the second stage of a screening line. The walk-through archway says a person is carrying metal; the handheld says where it is, so the search can be resolved in seconds rather than by emptying pockets. Because these are bought in quantity and used continuously, the specification that matters is battery life per shift and how well the unit survives being dropped. Build is to the requirement supplied with the enquiry.

Technical specification

Build: Manufactured to the specification supplied with the enquiry or tender
