

BOMB DETECTION EQUIPMENTS

Army Handheld Videoscope

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172245	Bomb Detection Equipments	China, exported worldwide

Description

A handheld videoscope puts a camera on the end of a flexible probe so an operator can look inside a void, a duct, an engine bay or a wall cavity without opening it. In search work the point is not image quality for its own sake but being able to clear a space that cannot be reached any other way. Probe length and diameter are the decisions that matter, and both follow from what you need to inspect. We build to the specification given.

Technical specification

Build: Manufactured to the specification supplied with the enquiry or tender
