

BOMB DETECTION EQUIPMENTS

Army Letter Bomb Detector

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172246	Bomb Detection Equipments	China, exported worldwide

Description

A letter bomb detector screens mail and small parcels before they reach a mailroom's sorting bench. Devices sent by post are small and deliberately unremarkable, so the screening has to be quick enough to run on every item rather than on selected ones. Throughput, aperture size and the display an operator works from are all specified at order, and we manufacture to a tender's own schedule where one is issued.

Technical specification

Build: Manufactured to the specification supplied with the enquiry or tender
