

BOMB DETECTION EQUIPMENTS

Army Liquid Explosive Detector

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172247	Bomb Detection Equipments	China, exported worldwide

Description

A liquid explosive detector determines whether a sealed bottle or container holds a threat liquid without it being opened. That last point is the whole purpose: opening containers at a checkpoint is slow, and it destroys the sample and the passenger's property either way. Container types, throughput and the substance library are all set against the site's own screening policy, and we build to the specification supplied with the enquiry.

Technical specification

Build: Manufactured to the specification supplied with the enquiry or tender
