

BOMB DETECTION EQUIPMENTS

Army Multizone Walk Through Metal Detectors

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172249	Bomb Detection Equipments	China, exported worldwide

Description

A multizone walk-through detector divides the archway into separate detection zones so the display shows roughly where on a person the metal sits. That is what separates it from a single-zone unit: the search that follows is directed rather than general, so the queue moves. Zone count, throughput and immunity to interference from nearby equipment are all specified at order, and we build against a tender's own annexure.

Technical specification

Build: Manufactured to the specification supplied with the enquiry or tender
