

BOMB DETECTION EQUIPMENTS

Army Optical Fibrescope Videoscope

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172251	Bomb Detection Equipments	China, exported worldwide

Description

A fibrescope videoscope combines optical and camera inspection on one flexible probe, which lets an operator work in places a rigid scope cannot reach and see detail a basic camera head cannot resolve. It is used where a void has to be cleared visually and there is no way to open it. Probe diameter sets what you can enter and probe length sets how far you can go. Both are specified at order against the inspection task.

Technical specification

Build: Manufactured to the specification supplied with the enquiry or tender
