

BOMB DETECTION EQUIPMENTS

Army Pocket Extension Mirror

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172252	Bomb Detection Equipments	China, exported worldwide

Description

A pocket extension mirror is carried rather than issued to a search point. It collapses to pen size and extends far enough to look under a seat, behind a fitting or into a recess, which makes it the tool an officer actually has on them when something needs a quick look. Reach, mirror size and whether it carries a light are set at order. We supply to the specification stated in the enquiry.

Technical specification

Build: Manufactured to the specification supplied with the enquiry or tender
