

BOMB DETECTION EQUIPMENTS

Army Self Balancing Scooter

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172254	Bomb Detection Equipments	China, exported worldwide

Description

A self-balancing patrol scooter extends the ground a single officer can cover on foot without putting them in a vehicle. On large perimeters, terminals, campuses and event sites that matters: the officer stays at eye level with people and can dismount immediately, which a vehicle patrol cannot. Range, load and terrain are the specification, and we build to what the enquiry states. Note that this product currently sits under detection equipment; it is patrol mobility equipment and would be better filed as such.

Technical specification

Build: Manufactured to the specification supplied with the enquiry or tender
