

BOMB DETECTION EQUIPMENTS

Army Single Zone Door Frame Metal Detector

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172256	Bomb Detection Equipments	China, exported worldwide

Description

A single-zone door frame detector is the entry-level archway: it reports that a person is carrying metal without indicating where. For sites with modest flow and a handheld detector at the exit side, that is often all that is needed, and it costs considerably less than a multizone unit. Sensitivity programmes, throughput and installation environment are set against the site, and we build to the specification supplied.

Technical specification

Build: Manufactured to the specification supplied with the enquiry or tender
