

BOMB DETECTION EQUIPMENTS

Army Telescopic Manipulator

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172257	Bomb Detection Equipments	China, exported worldwide

Description

A telescopic manipulator lets an operator move, lift or open a suspect item from a distance, using a gripper on the end of an extending pole. It exists for the moment between finding something and a disposal team arriving, when an item may need to be shifted and nobody should be close to it. Reach, grip type and load are the specification, and we build to the requirement stated. The product name is currently spelled "Telescopic" in the catalogue and should be corrected.

Technical specification

Build: Manufactured to the specification supplied with the enquiry or tender
