

BOMB DETECTION EQUIPMENTS

Army Wire and Cable Detector

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172261	Bomb Detection Equipments	China, exported worldwide

Description

A wire and cable detector traces conductors that are buried, run inside a wall or laid under a surface. In search work it is used to find command wires and hidden cable runs; in facility work, to locate services before anything is cut into. Depth performance and discrimination depend on the ground and on what else is buried nearby, so the specification starts with the site rather than with a range figure.

Technical specification

Build: Manufactured to the specification supplied with the enquiry or tender
