

BOMB DETECTION EQUIPMENTS

Army X-ray Baggage Inspection System

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172262	Bomb Detection Equipments	China, exported worldwide

Description

An X-ray baggage inspection system screens bags and parcels on a conveyor and presents the operator with a penetration image rather than a pass or fail. Material discrimination is what makes that image usable: organic, inorganic and metallic contents are separated by colour, so a threat is visible against ordinary clutter. Tunnel size, throughput, penetration and image handling are all specified against the site, and we manufacture to the tender schedule where one is issued.

Technical specification

Build: Manufactured to the specification supplied with the enquiry or tender
