

Product Name :
Pelleting Machine For Fish Feed

Product Code :
EQMH-CHINA-MY3001028

Description :

Pelleting Machine For Fish Feed

Technical Specification :

Floating Fish Feed Pellet Making Machine has the advantages of simple and convenient operation, long service life, and low labor costs, and reduces waste of materials in the production process. Increased utilization of materials.

Fish feed particles range from 0.8-14mm, and the protein content is as high as 50%.

It can suit various raw materials, such as corn flour, fish mill, meat mill and so on.

You can get various size of fish feed from 0.8-14mm and various shapes of pet food, such as: rings, triangle, core filling pet food etc.

We not only have the basic fish feed formula , but also the professional formula based on different kinds of fish.

The machines performance and products quality reach to the most advanced level in the world.

High efficiency, low consumption, easy to operate and maintain.

Wide range of applications, can adapt to a variety of production process, replaceable and adjustable screw can have different configurations to adapt different target product.

Stainless steel DDC with 12 steam injectors and 6 liquid nozzles.

The gearbox can stand strong torque and thrust up to 400hp.

Jacket design barrel with liner can achieve heating/cooling function.

Steam and water can also be injected directly into the barrel.

Screw is made of special anti-wear alloy with L/D ratio up to 18:1 that assures smoothly production for all kinds of sinking/floating feed.

Fast replacing mechanism for die and screw and on-line adjustment for cutter.

Installed power	76kw	95kw	140kw	178kw	280kw
Production Capacity	120-150kg/h	200-260kg/h	300-400kg/h	400-600kg/h	1.0-2.0 T/H
