

BULLDOZER

Construction 160HP Mechanical Driven Crawler Swamp Bulldozer

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172425	Bulldozer	China, exported worldwide

Description

The mechanical drive build of the 160 HP swamp dozer is specified where the work is heavy, the ground is soft and support is thin. On wide-track machines working soft ground, mechanical transmission has a practical advantage: there is less to go wrong far from a workshop, and what does go wrong can usually be put right on site. Wetland and reclamation contracts are almost always remote contracts. Wide tracks spread the machine's weight over a large footprint, keeping ground pressure low enough to operate on peat, paddy and soft fill. The correct track width depends on the bearing capacity of the ground you are working, which is why it is specified rather than fixed. Configuration is set at order against the buyer's own requirement, including tenders carrying their own technical annexure.

Technical specification

Engine power: 160 HP Drive type: Mechanical drive Undercarriage: Crawler track Configuration: Swamp (wide track, low ground pressure) Build: Manufactured to the specification supplied with the enquiry or tender
