

BULLDOZER

Construction 165HP Hydraulic Dozers

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172428	Bulldozer	China, exported worldwide

Description

A 165 HP hydraulic dozer is specified where blade accuracy matters as much as volume. Independent hydraulic drive to each track allows the operator to feather one side against the other, hold a line on a slope and counter-rotate in place. Contractors doing finish grading, canal profiles and formation work to tolerance choose hydraulic drive for that reason. The machine is built against the buyer's own schedule. Blade type, ripper, undercarriage, cab and emission compliance are all set at order, and where a tender defines its own technical annexure we manufacture and quote to that document.

Technical specification

Engine power: 165 HP Build: Manufactured to the specification supplied with the enquiry or tender

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
