

BULLDOZER

Construction 180HP Mechanical Driven Crawler Swamp Bulldozer

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172435	Bulldozer	China, exported worldwide

Description

The 180 HP swamp dozer in mechanical drive is specified where the work is heavy, the ground is soft and the support is thin. Mechanical transmission keeps the drivetrain simple enough to maintain with the owner's own fitters, which matters on reclamation and wetland contracts that are usually a long way from a service centre. The wide-track undercarriage is what allows the machine to operate at all on peat, paddy and soft fill, by spreading its weight far enough to stay above the bearing limit of the surface. Undercarriage, blade, cab and compliance are configured at order and manufactured to the buyer's specification.

Technical specification

Engine power: 180 HP Drive type: Mechanical drive Undercarriage: Crawler track Configuration: Swamp (wide track, low ground pressure) Build: Manufactured to the specification supplied with the enquiry or tender
