

BULLDOZER

Construction 320HP High Drive Crawler Dozers

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172447	Bulldozer	China, exported worldwide

Description

At 320 HP the crawler dozer is a bulk earthmoving machine: mass excavation, overburden stripping, dam and embankment fill, and push-loading scrapers. Production per hour rather than versatility is what it is bought for. The high drive undercarriage matters more at this size than at any other. A machine of this weight working continuously puts very high shock loads through the drivetrain, and raising the final drives out of the track line is what keeps those loads in the undercarriage where they can be absorbed and serviced. Blade, ripper, undercarriage and cab are specified at order and manufactured to the buyer's schedule.

Technical specification

Engine power: 320 HP Undercarriage: Crawler track Configuration: High drive, elevated sprocket Build: Manufactured to the specification supplied with the enquiry or tender
