

BULLDOZER

Construction 320HP Hydraulic High Drive Elevated Sprocket Crawler Bulldozer

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172450	Bulldozer	China, exported worldwide

Description

The 320 HP dozer in hydraulic drive with a high drive elevated sprocket undercarriage is specified for continuous bulk production where downtime is expensive. Independent hydraulic track drive gives full power to either track through a turn rather than dividing it, which keeps the blade loaded while the machine changes direction. Raising the final drives above the track line takes the drivetrain out of the debris path, so ground shock is absorbed by the undercarriage and the drives can be serviced without splitting the track. The machine is manufactured to the buyer's own specification, quoted line by line against a tender's technical annexure where one exists.

Technical specification

Engine power: 320 HP Undercarriage: Crawler track Configuration: High drive, elevated sprocket Build: Manufactured to the specification supplied with the enquiry or tender
