

BULLDOZER

Construction 430HP Hydraulic High Drive Elevated Sprocket Crawler Bulldozer

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172452	Bulldozer	China, exported worldwide

Description

At 430 HP this is the largest dozer in the range, specified for mass excavation, mine overburden and large dam and embankment work. Machines of this size are bought against a production figure in cubic metres per hour, and the blade is sized to the material rather than to the machine. The elevated sprocket undercarriage is standard practice at this weight. Lifting the final drives clear of the track line isolates them from ground shock and allows service without breaking track, which on a machine costing this much per idle hour is the point. Everything is configured at order. Where a tender carries a technical annexure, we build and price against that document rather than offering the nearest standard model.

Technical specification

Engine power: 430 HP Undercarriage: Crawler track Configuration: High drive, elevated sprocket Build: Manufactured to the specification supplied with the enquiry or tender
