

BULLDOZER

Construction Mechanical Driven Crawler Bulldozer

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172457	Bulldozer	China, exported worldwide

Description

A mechanical drive crawler dozer built to the power class the buyer specifies. Mechanical transmission is chosen where simplicity and field repair matter more than fine blade control: fewer components to fail, and failures that can usually be diagnosed and fixed on site rather than by a visiting specialist. Because the power class, blade, undercarriage and cab are all set at order, this listing covers the configuration rather than a single fixed model. State the work the machine is for and the conditions it will operate in, and we build to that. Tenders with their own technical schedule are quoted and manufactured against that schedule.

Technical specification

Drive type: Mechanical drive Undercarriage: Crawler track Build: Manufactured to the specification supplied with the enquiry or tender
