

WHEEL LOADER

Construction 12 Ton 6.5m³ BUCKET Largest Wheel Loader

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172460	Wheel Loader	China, exported worldwide

Description

At 12 tonnes with a 6.5 m³ bucket this is the largest loader in the range, specified for mine and large quarry duty where it loads rigid haul trucks or feeds a primary crusher directly. Machines at this size are bought against a haul cycle. The bucket is sized so that a set number of passes fills the truck being loaded without a part pass at the end, because a part pass wastes a full cycle. That calculation depends on the truck, the material density and the site, which is why the bucket is specified rather than fixed. The machine is built to the buyer's own schedule and quoted against a tender annexure where one is issued.

Technical specification

Rated capacity: 12 tonne Bucket capacity: 6.5 m³ Undercarriage: Wheeled Build: Manufactured to the specification supplied with the enquiry or tender
