

WHEEL LOADER

Construction 3 Ton 1.7m³ BUCKET Wheel Loader

PRODUCT CODE	CATEGORY	ORIGIN
EQMH-CHINA-MY3172462	Wheel Loader	China, exported worldwide

Description

This is the 3 tonne wheel loader with a 1.7 m³ bucket. That pairing is set for general purpose material of moderate density: sand, soil, gravel and general site fill. Heavier material would need a smaller bucket on the same machine to stay within the tipping load, and lighter material such as grain or wood chip can carry a larger one. The rest of the machine is configured at order. Tyres are matched to the surface, the coupler to the attachments you intend to run, and the cab and emission standard to the destination. Where a tender defines its own schedule, we quote and manufacture against it.

Technical specification

Rated capacity: 3 tonne Bucket capacity: 1.7 m³ Undercarriage: Wheeled Build: Manufactured to the specification supplied with the enquiry or tender

Request a quotation

Send your capacity, voltage and destination port and we will reply with drawings, a price and a lead time within one working day.
